NAC IncomeChoiceSM 10 Product Details

GLWB VALUE	The GLWB Value is used as the basis for calculating Lifetime Payment Amounts (LPAs) which can provide lifetime income. This value is used only in determining Lifetime Payment Amounts and not as the basis for calculating the Accumulation Value, Death Benefit or other withdrawals from the contract.																																																																																																																																																																																																								
GLWB BONUS	A 5% GLWB Bonus will be applied to the GLWB Value on all premiums received in the first five contract years.																																																																																																																																																																																																								
GLWB STACKING ROLL-UP CREDIT	<p>In addition to the GLWB Bonus, a GLWB Stacking Roll-Up Credit may be added to the GLWB Value during the first 20 contract years and it compounds annually. On each contract anniversary during the first 20 contract years, the current GLWB Value may be increased by 2% of the GLWB Value plus 150% of dollar amount of any interest credited to the Accumulation Value. The GLWB Stacking Roll-Up Credit only applies if no withdrawals are taken in the contract year. The GLWB Value is ultimately used to calculate your Lifetime Payment Amount.</p> <p><i>The GLWB Bonus and GLWB Stacking Roll-Up Credit do not apply to the Accumulation Value or Death Benefit. The GLWB Stacking Roll-Up Credit applies to the GLWB Value in the first 20 contract years and does not apply if a withdrawal is taken (RMD excluded) during the year or after Lifetime Payments are elected.</i></p>
